# LITTLE PEARLS

## ENGLISH MEDIUM SCHOOL

Narengi Chandrapur Road, Amgaon (Bonda)  
Guwahati-781026 (Assam)

## *About Scholar's Society*

Scholar's Society a name that resonates with 'Quality Education', with a deep focus on overall development of the students. Our journey of educating students started from the year 2008 with an objective of making difference in the lives of the 'not so privileged children'.

In 2013, we started with a small school under the name of 'JH Scholars Academy-Little Pearls' in Guwahati, which is in the North Eastern part of India. The children of less privileged section of society wherein the parents are less educated and working on petty earnings like from driving auto, milk delivery, tailor and other small-time work, were deprived of English medium schools and quality education following CBSE curriculum.

We strongly believe that quality education is a right of every child right from early schooling. The right to education that builds up the basics of communication skills and skills that make him/her employable are rights of every child irrespective of financial status of his/her parents. Believing this we have extended our hands of support to parents of children who are living in distant parts of Guwahati with meagre income and lack affordability to send their children in high profile English medium schools.

## *Little Pearls ... a way beyond commitment to education*

We took up the task of counselling the parents of those selected children for sending their children to English school for enriching their future and make them come out of their present less privileged status.

What started with a small set up in a lease premises in Guwahati with a smaller number of students has now grown to 186 students ranging from KG1 standard to 9th grade. Our school is conducting curriculum as per CBSE norms.

## Our Mission

Scholar's Society is a commitment, a mission to empower the less privileged children in helping them towards a bright future.

Our Mission has many pathways which starts from -

- ☑ Quality education in English Medium
- ☑ Special focus on Maths, English and Science
- ☑ Focus on building communication skills.
- ☑ Building concepts through Digital education
- ☑ Overall personality grooming through extra-curricular activities.

## Our Motto

Quality education, not just education is the right of every child irrespective of location and financial status

## *Initiatives of Scholar's Society*

"*Podhega India, tabhi to badhega India*", true to the saying we have been following the mission ever since 2008 by reaching to remote and rural villages of Assam.

The parents who are auto drivers, milkman, grocery shop workers; some of them were desirous to send their children in good schools whereas some of them were completely illiterate and did not understand the importance of quality education, we convinced them to send their children to schools and promised to give them basic education for betterment of their children's lives. We charge lowest fee in comparison to other English medium schools and that makes quality education affordable for all.

### *Extra-curricular*

Apart from curriculum, we also conduct activities focused on building language skills, science exhibitions, conducting literature weeks, on periodic basis.

### *Sports activities*

"*A healthy child is an asset to the entire nation*" - Knowing this we have sports facilities for indoor as well outdoor games to maintain a healthy mind and body.

### *Self-defence: a necessity*

We have initiated to give them physical training from professionals in Martial arts, Karate etc. These trainings are offered at very nominal rates like Rs.50 per month, so that the parents send their children willingly for these trainings without feeling additional financial burden.

### *Sponsorship for students*

With this initiative the sponsor person/organization selects children from any section and sponsors full educational expenses of the student. The sponsorship can be for one single student or for a group of students and can be for one academic year or multiple years.

### *Scholarships for the brightest*

We bring the spirit of academic excellence by offering scholarships to 2 students of each class during the academic year from the school fund. This boost their confidence and motivate them to excel further in all ventures of their life.

## Road ahead...School In own premises

We are in the process of building our infrastructure in our own land. In the new premises we are proposing to construct –

- ☑ Around 12 classrooms for grade 1 to grade 10 students
- ☑ Special classrooms for Nursery to KG students
- ☑ 2 washrooms each for girls and boys
- ☑ 2-3 Digital classrooms
- ☑ Inhouse community area with indoor games and library
- ☑ Outdoor sports facilities
- ☑ 2 Science laboratories

## Expanding outreach to more students

The present leased premises have limited area to accommodate students. We are therefore proposing to have larger premises with 10-12 classrooms which will accommodate a greater number of students. From present strength of 186 students, we are expecting to increase strength to 250-300 students.

## Our unique Social Outreach initiatives

### Promoting Social Responsibility in students

On the occasion of forthcoming Children's Day, we conducted a Social Responsibility program wherein senior students conducted drawing and colouring competition for the neighbourhood children which was conducted at the Anganwadi school. We connected around 250 students and 22 Anganwadi. This ignited the feeling of social connect and social responsibility among our students. The higher-grade students also distributed sweets and gifts to Anganwadi students as a token of participation.

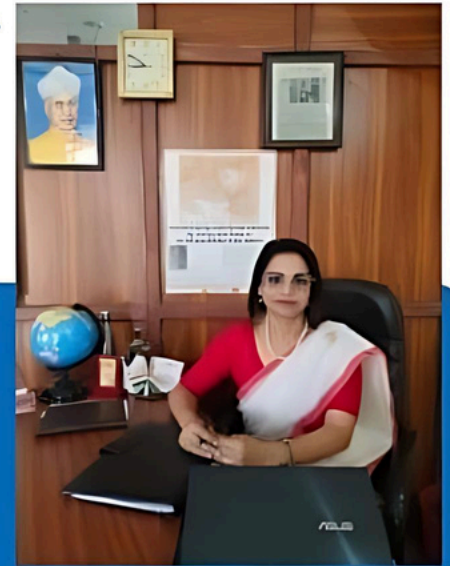

## Additional guidance for the 9-10th standard students

In an effort to prepare the students of 8th and 9th standard for the 10th standard board exams, we conduct extra classes on subjects like Maths and Science.

## Jasmine Hussain

Founder and Principal

An educationist for over 18 years, possesses M.Sc. Zoology from Annamalai University and MBA in Human Resources and a Master's in Education from Guwahati University. Her overall career revolves around education industry right from working at the grass-root level to setting up and running a school of her own. She had bid goodbye to her corporate career spanning 7 years to materialize her dream of starting her own school with innovative methods.

JH Scholars Academy- Little Pearls School, under Scholar's Society was established in the year 2013 with a dream to revolutionize education standards for the marginalized section of children. Jasmine being a part of education industry backed by qualifications had deep understanding about teaching, pedagogy, extra-curricular activities focusing on overall development of the children and which is reflected in successful running of the school for over 10 years now.

### Awards and Recognition

Her dedication and hard work were recognized by different organizations.

She was selected among 64 different women entrepreneurs from all over India for a boot camp program -Breaking the Glass Ceiling by U.S. Consulate General in association with the University of Texas in the year 2020.

In 2023, she was selected again for an Entrepreneurship development program under U.S. Consulate General, Kolkata.

She is recognized as a prominent Women Entrepreneur for providing accessible education. Along with her, the school was also recognized for improving social connect.

1. 2018- Awarded Best Emerging School in Assam
2. 2019- Awarded Best Standalone School in Assam
3. 2020- Awarded Best Women Entrepreneur (Education) in Assam
